

HABIBA AYMAN MAHMOUD

+01279291764 | ha309933@gmail.com | Mansoura , Egypt | [LinkedIn](#) | [GitHub](#)

Highly organized and efficient executive assistant with a strong focus on detail and a commitment to delivering exceptional support.

EDUCATION

Senior year - Faculty of computer and information science

Mansoura University | 2023 - 2027

Major : computer science

Grade : Excellent

WORK EXPERIENCE

AI & Data Science – Microsoft Data Engineer

Jul 2026 - Jan 2027

Digital Egypt Pioneers Initiative (DEPI) – Ministry of Communications and Information Technology (MCIT)

- Developing data engineering skills through hands-on training in Python, SQL, database management, and data transformation, building a foundation for reliable analytics and AI-driven solutions.
- Building data pipelines and working with Microsoft Azure technologies to understand how data is collected, processed, stored, and prepared for analytics and business intelligence.
- Applying data engineering concepts through practical projects and real-world scenarios, strengthening skills in ETL, scalable data architectures, big data processing, and cloud-based workflows.

MindRoad – Structured Learning & Roadmap Platform

Mar 2026 | [GitHub](#)

Freelance Project - Database Design & Implementation

- Designed and implemented the relational database architecture using SQL Server, modeling Tracks, Roadmaps, Levels, Topics, Resources, Users, and platform interactions.
 - Applied ERD design, normalization, primary/foreign keys, and relational data modeling to build a structured database supporting learning progress, projects, reviews, comments, bookmarks, and subscriptions.
 - Collaborated with backend and frontend developers to integrate the database with the web application's features.
-

PROJECTS

Rehab Motion Datasets (KIMORE & REHAB24-6) – PhysioForm AI

Sep 2026 | [GitHub](#) | [GitHub](#)

GitHub Python | pandas | SciPy | ETL

- Standardized 284,882 frames of Kinect joint-angle data (78 subjects, 5 exercises) into one schema, with audit logs for every skipped or failed file.
- Converted REHAB24-6 3D mocap skeletons into MediaPipe-style landmarks and sliced them into labeled repetitions across 6 exercises.
- Derived 3,017 per-rep correctness labels from an expert baseline and documented their limitations for downstream ML use.

- Developed an AI opponent in Python using Minimax with Alpha-Beta Pruning for strategic game-state evaluation and move selection.
- Implemented a 3-level search strategy to evaluate possible moves and optimize the AI's decision-making.
- Built an interactive Tkinter GUI and used Python threading for responsive, non-blocking AI computation.

COURSES AND CERTIFICATIONS

AI for You: Training and Assessment — Oracle University

04 Aug 2026

- Completed a practical AI learning path covering Artificial Intelligence, Machine Learning, Deep Learning, Data Science, Generative AI, and AI Agents.
- Explored standard AI workflows and real-world industry applications, developing an understanding of how AI can support business processes and decision-making.
- Studied responsible AI principles, including AI limitations, risks, bias, and ethical considerations, through Oracle's structured training and assessment.

C# (Basic) — HackerRank Certification

28 Jun 2026

- Earned the HackerRank C# (Basic) Certification,
- demonstrating foundational knowledge of C# programming, including program structure, data types and variables, basic OOP, properties and indexers, collections, and exception handling.

InnovEgypt Program — ITIDA / TIEC

Aug 2024

- Completed a 45-hour training program focused on innovation and entrepreneurship.
- Developed a final project for a potential startup, applying the training concepts to a practical project.
- Applied problem-solving and innovation skills while working toward a startup-oriented solution.

SKILLS

- Programming: Python, SQL, C# (Basic), JavaScript, HTML, CSS
- Data & Databases: Microsoft SQL Server (SSMS), Database Management, Data Modeling, ETL, Data Pipelines, Data Transformation
- Cloud & Data: Microsoft Azure, Big Data Processing, Cloud Data Workflows
- AI & Data Science: Machine Learning Fundamentals, Deep Learning Fundamentals, Generative AI, Data Science Fundamentals
- Tools: Git, GitHub, Visual Studio, VS Code
- Soft Skills: Teamwork, Communication, Problem Solving, Time Management

LANGUAGES

- **English: Fluent**
- **Arabic:** Fluent (native language)
